EUROPEAN COMMISSION
 DIRECTORATE-GENERAL PRESS AND COMMUNICATION

Item 4: Iraq - Letter from 8 European Leaders in today's Times

Jonathan Faull and Emma Udwin, in reply to questions, said the letter was not incompatible with the Council common position reached on Monday. Neither President Prodi nor Mr Patten had received prior notification of the statement.

Text of the Council common position follows:

"The Council, deeply concerned about the situation in Iraq, reaffirms that its goal remains the effective and complete disarmament of Iraq's weapons of mass destruction. The Council fully supports the efforts of the UN to ensure full and immediate compliance by Iraq with all relevant resolutions of the Security Council, in particular with UNSCR 1441 of 8 November 2002. The resolution gives an unambiguous message that the Iraqi Government has a final opportunity to resolve the crisis peacefully.

VERBATIM

The Council therefore urges the Iraqi authorities to engage in full and active cooperation with UNMOVIC and IAEA. The Iraqi authorities must, as an imperative, provide the inspectors, without delay, with all additional and complete information on questions raised by the international community. The Council expresses its appreciation for the work accomplished by the inspectors so far and reiterates its confidence and full support for Dr. Blix and Dr. El Baradei to complete their mission in accordance with UNSCR 1441. It welcomes their intention to continue and intensify their operations.

The Council recalls that it stands ready to engage all necessary efforts to answer the needs of UNMOVIC and IAEA in personnel and practical means.

The Council underlines the fundamental importance of preventing the proliferation of weapons of mass destruction in accordance with the relevant international instruments. The Security Council has a key role to play in these endeavours.

The Council reaffirms the role of the UNSC in the implementation of UNSCR 1441. The responsibility of the UNSC in maintaining international peace and security must be respected."
