REX-ROTARY 

the office printing-press

and it's quality all through!

The operation of the M4 is child's play, and with the ingenious construction and technique it solves the printing jobs of the office in record time.

Electronic Stencils mean unlimited Possibilities...

The electronic stencil is a revolution in the reprographic field. In a few minutes any original is transferred to an electronic stencil, which can then be mounted on your M4 where it will produce thousands of perfect copies. With Electro-Rex you save time and cut down the printing costs for drawings and blocks. Give us a call or write for sample-prints to show you how other companies profit by the versatility of the Electro-Rex

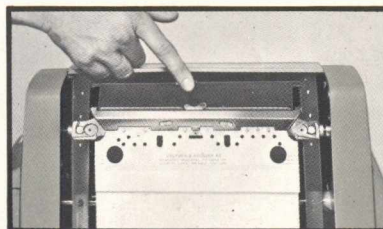

REX-ROTARY M4[®]

solves any job...

Your ideas can be converted to quickly, into thousands of attractive and perfect prints. The M4 reproduces any kind of letterpress, print, including forms, illustrations, photographs etc., etc. The M4 prints any size, from foolscap to postcard, from cardboard to thin paper.

REX-ROTARY M4 gives you many other advantages, and a demonstration in your own office will soon convince you that the M4 is YOUR machine.

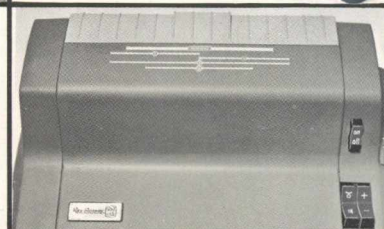

Lightning-fast Adjustment.

In a few seconds the print is positioned on the sheet and if required can be re-aligned by means of a simple adjustment.

Inking.

The M4 has automatic ink distribution over the entire printing area or – if desired – just in sections.

Ready – Go!

Simply set the counter to the desired number of copies, and the printing will stop automatically when this number has been reached. The M4 has synchronized paper feed – a decisive feature in composite printing and multi-colour work.

Colour-change

A few grips – and the whole inking system is out and a new one inserted. It is done in no time, and there is no risk of soiling hands or clothes.

Practical and neat Ink Cartridge.

Never again will you have to use a tube or can – only the elegant ink cartridge, which also ensures that you use up the contents to the very last drop.

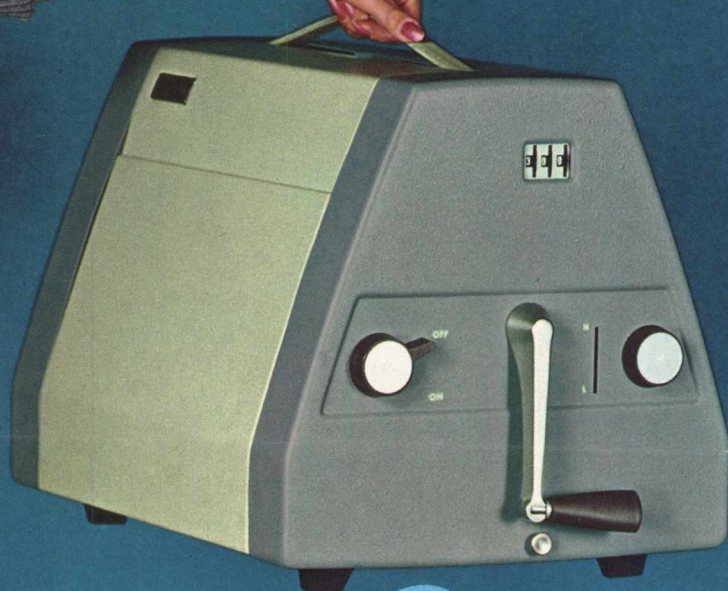

Reduce your Printing Costs

Your printed matter costs will be reduced because the M4 means economy of time and money, and the price of the machine is so low that in any office – large or small – the machine will quickly and easily pay for itself.

The *REX-ROTARY* 300[®]

The exciting new all-purpose duplicator from the world-wide Rex-Rotary organisation

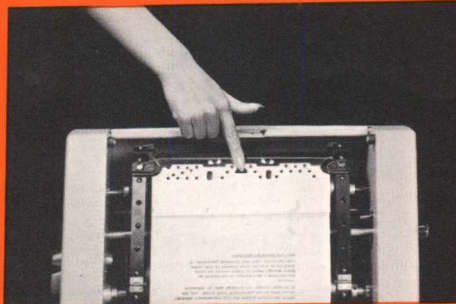

The new Rex-Rotary 300 is the ideal printing press for the smaller runs – able to cope with any duplicating job ... a "lightweight" that goes from hand to hand, from office to office, from one club member to another, because it is so portable!

The Rex-Rotary 300 is simple to operate and fast too! Anyone can use it – and any organisation can afford it! A quality product that will work economically and faithfully for many years.

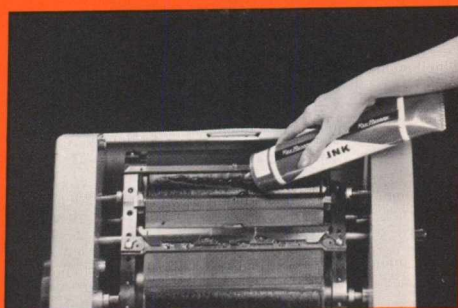

... from
ideas to
prints in
seconds

1

Type or sketch your Rex-Rotary stencil – and fit it to the machine.

2

Ink the cylinder with Rex-Rotary quick-drying ink (available in 12 colours).

3

Then simply turn the handle – and perfect prints are now available – the counter tells you how many. The feed tray holds 250 sheets of any size of paper from postcard to foolscap.

So easy and effortless is it to
print with your new, portable

REX-ROTARY

300

Handles any form of illustration

Drawings, prints and photographs which can be reproduced on the Electro-Rex electro-stencil cutter can be printed in colour – several, if required, on the same sheet. The possibilities are limited only by your own imagination. Ideas can be turned into letters, and letters into sales and eventual orders – or for whatever purpose you may desire or require.

Technical advantages

Height and margin adjustment. Angular adjustment making possible the adjustment of stencils cut askew. Three-digit counter showing actual number of copies – not the turns of the handle when the machine is idling!

For Schoolteachers and Students

... information for parents, and individual class curriculum. The students can also print their school magazine themselves.

In Action at Headquarters or in the Field

... the printing press must be portable and yet easy to handle. Vital information must be produced immediately.

For Church and Social Functions

... interesting news or information for church members. It always pays to have the Rex-Rotary 300 at hand!

May I use the machine tonight?

You can use it wherever or whenever you want. It is so easy to carry – with feed and receiving trays in closed position.

REX-ROTARY
INTERNATIONAL CORPORATION A/S

Ask for a demonstration by your local distributor or stockist. He will be pleased to tell you much more about the new portable Rex-Rotary 300, and you can then see for yourself the work it can do for you!
