Andreas G. Papandreou, commenting on the Congress in Vienna of the Center Union Party abroad, said the following:

"Those of us who live abroad today have only one solemn duty: To dedicate ourselves to the national liberation struggle of our enslaved brothers.

The fabricated Vienna Congress served only those interests that wish to perpetuate the present US occupation of our country. The Greek people are indifferent to these machinations of the reactionary forces abroad.

The Greek people inside Greece will themselves determine their own destiny after the liberation struggle has been won. They will build a Greece where the people are sovereign, the army belongs to the nation and Greece belongs to the Greeks."
